Source-checking and data comparison worksheet

Record two pieces of evidence and decide whether they support the same comparison. Use this for a statistic, a listing, a forecast or a reading.

1. Write the claim in one sentence

Claim and area to check

---

2. Record the evidence

What to check	Source A	Source B
Publisher and URL		
Value, unit and denominator		
Area, definition or population		
Reference period and date checked		
Method, flags and missing details		

3. Make a comparison decision

If units, dates or areas differ, find matching evidence or state the limitation beside the figures. If a conversion is needed, show the inputs and operation.

Comparison verdict and reason

One check another reader can repeat
